Residence Recycling FAQ - HUB

**How do you recycle properly?**

The recycling system at HUB has three streams: recyclables, beverage containers, and waste.

**Recyclables**
All you need to do is collect your recyclables (except beverage containers) in your room, bring them outside and place them in the outdoor blue bin.

**Beverage containers**
You have two options:
1) Bring your beverage containers to the beverage container recycling bins in the common areas of HUB mall.
2) Bring them to a local Bottle Depot.

**Waste**
Put the rest of your waste in a bag and place it directly into the waste bin just outside the loading dock beside the blue bin.

For more information on recycling in residence, visit: [residence.ualberta.ca/CurrentResidents/Sustainability](http://residence.ualberta.ca/CurrentResidents/Sustainability)

**What can you recycle?**

At HUB, you can recycle beverage containers, paper and cardboard, glass and light metals, and plastics.

Please help us reach our goal of keeping 50 per cent of UAlberta's waste out of the landfill by 2015.
Where are the recycling bins located?
The large, blue single stream recycling bin is located outside the HUB mall loading dock.
The large, green bin for waste is located outside the HUB mall loading dock, beside the large, blue single stream recycling bin.

What do you need in order to recycle properly?
It’s simple! All you need is a small container to collect your recyclables, and some garbage bags. Your room is supplied with a waste bin.

Where do the recyclables and waste go after you put them in the bin?
Recyclables are picked up by a contracted hauler and brought to a materials recovery facility where they are further sorted for recycling.
Waste is collected by our contracted waste hauler and brought to a contracted landfill.
